Critical Solutions Provider

O

COMPACT ARM BASED EMBEDDED INDUSTRIAL COMPUTER

Model: PMM0103 Document: Data Sheet Document version: 1.6 Date: November 2020

COPYRIGHT NOTICE

The information in this document is subject to change without prior notice to improve reliability, design, and function and does not represent a commitment on the part of the manufacturer.

In no event will the manufacturer be liable for direct, indirect, special, incidental, or consequential damage arising out of the use or inability to use the product or documentation, even if advised of the possibility of such damages.

This document contains proprietary information protected by copyright. All rights are reserved. No part of this manual may be reproduced by any mechanical, electronic, or other means in any form without prior written permission of the manufacturer.

TRADEMARKS

All registered trademarks and product names mentioned herein are used for identification purposes only and may be trademarks and/or registered trademarks of their respective owners.

AMI is a trademark of American Megatrends Inc.

Intel & Atom are trademarks of Intel Corporation

IBM, PC/AT, PS/2&VGA are trademarks of International Business Machines Corporation Microsoft Windows is a trademark of Microsoft Corp. RTL is the trademark of Realtek Semiconductor Co., Ltd.

DECLARATION OF CONFORMITY

This restriction is subject to protect the operational process of the system in the business environment, which will produce, use, and transmit radiofrequency energy. Harmful interference to radio communication could result if instructions to the correct installation and usage were not applied. The interference prevention cannot be guaranteed even with proper installation according to the manual. If the device causes a bad effect on the radio / TV signal. The user could preclude that by turning the device on/off.

When this device produces some harmful interference, the user can use the following measure to solve the interference problem:

1-Setting the receiving antenna's direction or location to increase the distance between this device and receiver.

2-Plug in the device's power connector into different circuits of the power outlet with the receiver.

3-If any technical support is needed, the dealer or experienced radio/TV technical personnel must be informed.

TECHNICAL SUPPORT AND SERVICE

Visit <u>Pmm-usa.us</u> to browse FAQs and get further details. User should collect the following information before submitting technical support and service requests:

- Product name, model and serial number.
- Installed software (operating system, OS version, installed applications and so on).
- Full description of the problem

-Detailed information about every error.

SAFETY INSTRUCTIONS

- Only trained and qualified personnel can install, operate, or maintain the device.
- Before starting the installation, all safety precautions must be read and warning labels affixed to the device must be observed. Doing so protects the device from damage and ensures your safety.
- Safety precautions provided in this document may not cover all safety aspects, note to always remain mindful of safety.
- PMM is not liable for any consequence that results from violation of regulations pertaining to safe operations or safety codes pertaining to design, production, and equipment usage.
- DO NOT use liquids or decontamination spray to clean the device surface and assure that it is totally disconnected while cleaning.
- Take all measures to prevent device drop before or during installation.
- Prior to connecting the device to power source, ensure the source and device voltage and power are 100% matched.
- Keep the cables in a suitable covered place.
- If the device is not used for a long time, shut off the power to avoid the damages by transient overvoltage.
- DO NOT allow any liquid flow into the device; to avoid fire or short circuit.
- The recommended storage temperature range should NOT be less than 30°C OR higher than 85°C.

🗥 Warning:

- Read the power source and device inlet carefully.
- Handle device with both hands.
- Clean and maintain the device using recommended, safe and suitable methods.

Caution:

If any unauthorized changes of settings or repairs are done without PMM approval; then user's rights of controlling this device will be canceled.

KEY FEATURES

- Allwinner H3, Quad-core Cortex-A7 CPU
- 512MB RAM and Embedded 8GB eMMC hard drive
- 2x Ethernet 10/100 ports
- Supports 2.4 WIFI
- Built-in 1x Rs485 COM port
- 3x customized serial/IO communication ports covering all industrial standards
- 1x USB2.0 Type A
- Ubuntu Core operating system
- Arduino[®] compatible programming
- Built to meet all harsh environment and Power substation requirements
- Wide range of power supply options
- -40 to 85°C system operating temperature
- Compact size with fanless design
- Wide range of mounting options
- Degree of protection: IP54

TARGET APPLICATION

PMM0103 rich features industrial-grade computers can provide long lasting and reliable operation with wide range of applications and already implemented on the following field applications:

- Factory and Machine automation
- Power plant controllers
- NTP timing servers
- SQL data banks
- Field data loggers
- Protocol and Media converters
- PV Tracker controller
- ...And many more.

DESCRIPTION

PMM0103 is a rugged powerful reliable fanless Linux based embedded industrial computer, powered by Allwinner H3 CPU, which offers high-performance processing with a high degree of functional integration.

The device represents an ideal computing solution for tight spaces, since it is highly compacted in size, designed with small footprints and multiple I/Os. Covered by a durable metal chassis which was designed and tested on the field to withstand shock, vibration, extended temperature ranges and challenging elements of a harsh environment.

PMM0103 offers the client a wide range of interfaces covering most of the industrial standards and increasing the connectivity.

Moreover, PMM0103 is especially designed to meet all power substation requirements and covers all field standards of power, reliability, easy configuration and long-lasting life.

TECHNICAL SPECIFICATIONS

Computer

م ه

CPU	Allwinner H3, Quad-core Cortex-A7 CPU
DRAM	512 DD3RAM
Storage	8GB eMMC
RTC CHIP	DS3231
Pre-installed OS	Ubuntu Core

Computer Interface

Ethernet	2x 10/100Base-T RJ45
USB	1x USB2.0 Type A
	1x Micro USB
Wi-Fi	2.4 GHz
Serial	1x RS485
Optional Interface	16 pin connector on edge with following connectivity options (max 3 options can
	be chosen upon order to be factory pre-fitted)
	RS232
	RS485
	RS422
	CAN bus
	Analogue Inputs
	Analogue Output
	Digital Inputs
	Digital Output
SD Slot	1x MicroSD card socket for user supplied card up to 64GB

Power Parameters

Power Supply Options	10-56 VDC 8-40 VAC 36-72 VDC 25-50 VAC
Power Connector	85-285 VAC / 100-300 VDC Phoenix Contact 4pins 3.5mm

Physical Characteristics

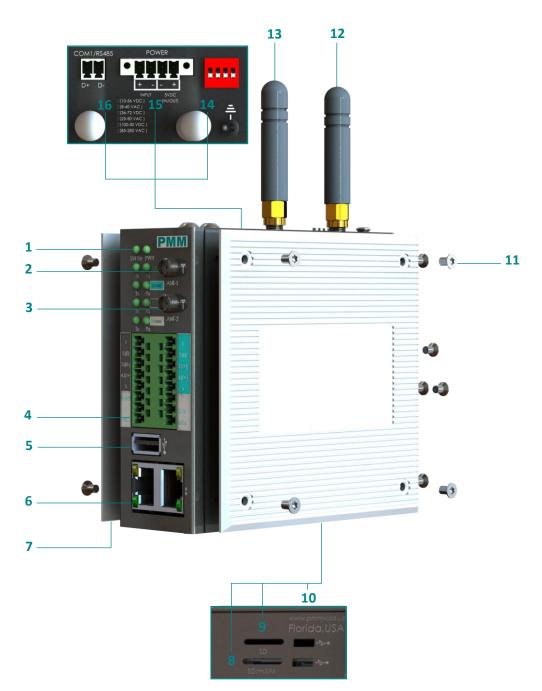

Housing	Metal						
Dimensions	3.93*3.93*1.45 inch (100*100*37 mm)						
Mounting Options	Standard 35mm DIN Rail						
	Direct Panel Mounting						
	Front Panel Mounting						
	19" rack 1U						
Certifications	RoHS, CE and FCC
